

Definitely one to take on board.

Indispensable for applications on the water: achieve great results in boat building and restoration with the FEIN MULTIMASTER. Thanks to its high cutting performance, the MULTIMASTER works perfectly with wood, fiberglass, carbon fiber-reinforced plastic and virtually all other relevant materials, eliminating manual work and improvised solutions. Great for renovating teak decks!

1. Sanding:

Ideal for restoring and maintaining boats: the FEIN MULTIMASTER sands effortlessly and precisely into every corner and on edges.

For accessories, see page 19 under „Sanding“

2. Finishing and renovating the deck:

Remove deck sealing materials quickly and thoroughly with the cutting blades. The time saving is 80% and more when renovating teak decks.

For accessories, see page 20 under „Cutting“

3. Adding fittings:

The MINI CUT saw blades are exactly the right size for working in tight spaces, difficult-to-reach spots or for sawing small recesses (above 3/8").
